

Medi-Cal Professionals: Need help getting through the EHR meaningful use maze?

Whether you are working on achieving one of the stages of meaningful use, implementing your certified electronic health record (EHR) system, or in the process of adopting certified EHR technology (CEHRT), Lumetra Healthcare Solutions is available to ensure your success **AT NO COST TO YOU.***

As a partner to the California Health Information Partnership and Services Organization (CalHIPSO) and Object Health, Lumetra Healthcare Solutions is contracted under the California Technical Assistance Program (CTAP) to provide comprehensive, free services to eligible Medi-Cal professionals.

Lumetra Healthcare Solutions assists providers in attaining the stages of meaningful use and supports enhanced quality, cost efficiency and improved patient outcomes.

Our expertise

Meaningful use of health information technology (HIT) leads to a strengthened infrastructure and improved data systems-- powerful resources for achieving innovative, value-driven care.

As an industry leader of EHR adoption programs with more than 30 years of experience in the U.S. and international markets, Lumetra Healthcare Solutions helps its clients deliver high-quality, integrated care through the use of certified EHR technology and health information exchange. Lumetra Healthcare Solutions works with large clinics, individual and small practices, and hospitals to optimize the use of EHRs to improve care delivery and health outcomes.

As a partner in the Regional Extension Center Program, Lumetra Healthcare Solutions has supported more than 2000 providers in successfully achieving meaningful use attestation, helping Medi-Cal providers select and implement EHRs to achieve meaningful use.

Our services

We offer the following technical assistance to providers who have not yet adopted electronic health records, to those still working on the full implementation of 2014 certified EHR and stage 1 meaningful use, to those providers poised to meet stage 2, 2015 through June 2018...and even stage 3!

- **Medi-Cal Incentive Program Guidance** – Assistance meeting all requirements of the Medi-Cal EHR Incentive Program.
- **Education and Outreach** –Effective strategies to help you select, implement, and meaningfully use CEHRT.
- **EHR Implementation** – Project management, planning and support during the entire EHR implementation process, including software configuration to meet practice needs, on-site software training and troubleshooting.
- **Practice and Workflow Redesign** – Support for practice and workflow redesign to achieve meaningful use of CEHRT, including mapping and redesigning work processes, and rapid cycle continuous quality improvements.
- **Achieving Meaningful Use** – Assistance attaining and advancing in stages 1, 2 and 3 of meaningful use, including implementing best practices to protect privacy and security.
- **Health Information Exchange** – Assistance connecting to available health information exchange infrastructure, including community health information organizations (HIOs), enterprise HIOs and point-to-point health information exchange.

Eligible professionals include physicians (including specialists), nurse practitioners, dentists, certified nurse midwives, optometrists, and physician assistants who, individually or with a group, meet the 30% Medi-Cal volume requirement (20% for pediatricians) for Medi-Cal EHR Incentive Program.
